CONTENTS OF VOLUME XXXI.

NUMBER XCI.

Page.

ART. I. On the Optical Phenomena presented by the "Silver-Spring," in Marion County, Florida; by Prof. JOHN LECONTE, - - - - - - - - - - - 1

II. On Nobert's Test Plate and the Striæ of Diatoms; by W. S. SULLIVANT and T. G. WORMLEY, - - - - - - 12

III. On the Track of an Animal lately found in the Potsdam Formation; by Sir W. E. LOGAN, F.R.S., - - - - 17

IV. Caricography; by Prof. C. DEWEY, - - - - - - 23

V. The motions of Fluids and Solids relative to the Earth's Surface; by W. FERREL, - - - - - - - - 27

VI. Geographical Notices; by D. C. GILMAN. No. XV, - 15

Arctic Explorations—The Hayes Expedition, 51.—Hall's Search for the Relics of Franklin's Expedition, 54.—Capt. Parker Snow's Proposal to Search for the Franklin Relics, 57.—Heuglin's Search for Dr. Vogel in Central Africa, 59.—Medical Statistics of the U. S. Army: Squier's Collection of Original Documents concerning the Discovery of America, 60.

VII. Researches on the Platinum Metals; by Prof. WOLCOTT GIBBS, M.D., - - - - - - - - - - - 63

VIII. On a Method of Producing Stereographs by Hand; by Prof. O. N. ROOD, (with an illustration,) - - - - 71

IX. Note on Sources of Error in the Employment of Picric Acid to detect the Presence of Potash; by M. CAREY LEA, 75

X. On a Series of New Combinations of Ammonia, Picric Acid and Metallic Bases; by M. CAREY LEA, - - - - - 78

XI. The Guernsey County (Ohio) Meteorites,—a complete account of the phenomena attending their fall, with a chemical analysis of them; by Prof. J. LAWRENCE SMITH, M.D., - 87

XII. Abstract of a Discussion of the Influence of the Moon on the Declination of the Magnetic Needle, from the observations at the Girard College, Philadelphia, between the years 1840 and 1845; by A. D. BACHE, Supt. U. S. Coast Survey, (with a diagram,) - - - - - - - - - - - 98

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the Chemical Analysis of the Solar Atmosphere, KIRCHHOFF, 103.—On a New Alkaline Metal, BUNSEN: On the colors of Flames, MERZ, 105.—The Dichroscope, 107.—Dove's 'Optical Studies': Method of mingling at will colors produced by absorption or interference: Influence of binocular vision upon the estimation of the distance of bodies seen by reflexion and refraction, 109.—On the application of the Stereoscope to distinguish copies from fac-similes: Electric Light: Improvements in the Microscope, M. C. WHITE, 110.—Tolles' Orthoscopic Eye-piece: Contributions to Analytical Chemistry: Alumina from Lime and Magnesia, 112.—Separation of Oxyd of Iron from Lime and Magnesia: Separation of Alumina and Iron from Manganese: Separation of Manganese from Magnesia and Lime: Separation of Strontia from Lime, 113.

Technical Chemistry.—Test for Fusel Oil, W. STEIN: Value of different kinds of Soap, R. GRAEGER, 114.—Pig-iron which contains Copper cannot be puddled, C. LIST, 115.—Preparation of Oxyd of Lead free from Copper and Iron, TH. WICHMANN, 116.—Cleansing of Mordanted Cloth before Dyeing, J. LŒWENTHAL, 117.—Incineration of Filters: On the Occurrence of the Hydrocarbon C_4H_2 in Coal Gas, BŒTTGER, 118.—Action of Carbonate of Soda on Cast-Iron, C. TISSIER, 120.

Geology.—Geological Survey of Canada; Report of Progress for 1858, 122.—Geological Surveys; Kentucky: Arkansas: Illinois: Texas: California, 124.—Canada: New York: Descriptions of new species of Crinoidea and Echinoidea from the Carboniferous rocks of Illinois, and other Western States, by F. B. MEEK and A. H. WORTHEN: Description of New Carboniferous Fossils from Illinois and other Western States, by F. B. MEEK and A. H. WORTHEN, 125.—Systematic Catalogue, with Synonyma, &c., of Jurassic, Cretaceous, and Tertiary Fossils collected in Nebraska, by the Expl. Exp. under the command of Lieut. G. K. Warren, by F. B. MEEK and F. V. HAYDEN, 126.—Observations on the Cretaceous Strata of Texas, B. F. SHUMARD: Die Silurische Fauna des westlichen Tennessee, by Dr. F. ROEMER, 127.

Botany and Zoology.—Thesaurus Capensis, or Illustrations of the South African Flora, etc., WM. H. HARVEY, M.D., F.R.S., &c.: Flora Capensis; being a Systematic Description of the Plants of the Cape Colony, Caffraria, and Port Natal, by WM. H. HARVEY, M.D., F.R.S., &c., and OTTO WILHELM SONDER, Ph.D., 128.—Flora of the British West Indian Islands, A. H. R. GRISEBACH, M.D.: Plantæ Wrightianæ e Cuba Orientali, A. GRISEBACH, 129.—Filices Wrightianæ et Fendlerianæ, etc., D. C. EATON: Local Botanical Catalogues: Additions to the Flora of Wisconsin, by T. J. HALE: Catalogue of the Flowering Plants and Ferns of Ohio, by J. S. NEWBERRY, M.D.: A Catalogue of Plants found in New Bedford, Mass., and its vicinity, by E. W. HERVEY: Catalogue of Phænogamous and Filicoid Plants of New Castle County, Delaware, arranged according to the Natural System, with the Synonyms of Modern Authors, by EDWARD TATNALL: Fungi Caroliniani Exsiccati; Fungi of Carolina illustrated by natural specimens of the Species, by H. W. RAVENEL, 130.—Uber Polyembryonie und Keimung von Cælebogyne: ein Nachtrag zu der Abhandlung über Parthenogenesis bei Pflanzen, von A. BRAUN: Illustrations of the Genus Carex, by FRANCIS BOOTT, M.D., 131.—A Second Century of Ferns; being Figures with brief Descriptions of one hundred new, or rare, or imperfectly known species of Ferns; from various parts of the World, by Sir WILLIAM JACKSON HOOKER, K.H., &c.: Species Filicum; being Descriptions of all known Ferns. Illustrated with Plates, by Sir WILLIAM JACKSON HOOKER, K.H., &c., 132.—Uber einige Farngattungen, von Dr. G. METTENIUS, 133.—Filices Horti Botanici Lipsiensis, G. METTENIUS, 134.

Zoological Notices.—On the genus Peasia: On the genus Bipaliura, by WM. STIMPSON, 134.—The Museum of Comparative Zoology in Cambridge, Mass., 135.

Astronomy and Meteorology.—Three more Asteroids: New Comet: Further observations on the Shooting Stars of August 9–10, 1860: At Chicago, Ill., by Mr. FRANCIS BRADLEY and others, 136.—Paris, France, by M. COULVIER-GRAVIER: Rome, Italy, by M. SECCHI: Shooting Stars in November, 1860: Near Cape Hatteras: New Haven, Conn., 137.—New York City: Montgomery Co., Md., 138.—Bloomington, Ind.: Narrative of the American Expedition to N.W. British America, to observe the total Solar Eclipse of July 18th, 1860, by WM. FERREL, 139.

Book Notices.—On the Impurities of Commercial Zinc, with Special Reference to the Residue insoluble in Dilute Acids, to Sulphur, and to Arsenic, by CHARLES W. ELIOT and FRANK H. STORER, 142.—A Practical Treatise on Coal, Petroleum, and other distilled Oils, by ABRAHAM GESNER, M.D., F.G.S., 147.—General Problems from the Orthographic Projections of Descriptive Geometry, etc., by Prof. S. EDWARD WARREN, C.E., 148.—Cooke's Chemical Physics: Silliman's Principles of Physics, 149.

Miscellaneous Scientific Intelligence.—Earthquake, 150.—Two new Meteorites, by J. LAWRENCE SMITH, 151.

Obituary.—J. P. Espy, 151.—David Dale Owen, 153.—Mr. S. A. Casseday, 155.

Bibliography—By J. NICKLÈS, 155.

Proceedings of Societies, 156.

NUMBER XCII.

Page.

ART. XIII. On the Appalachian Mountain System; by Prof. ARNOLD GUYOT.—(With a map), - - - - - - 157

XIV. On the Formation of Picramic Acid; by M. CAREY LEA, 188

XV. Remarks on a proposed Process for the Estimation of Nitrogen, and on an Acidimetric Process, by the same, - - 189

XVI. On the Dimorphism of Arsenic, Antimony and Zinc; by JOSIAH P. COOKE, JR., - - - - - - - - - 191

XVII. General Account of the Results of Part II. of the discussion of the Declinometer Observations made at the Girard College, Philadelphia, between 1840 and 1845, with special reference to the Solar Diurnal Variation and its Annual Inequality; by A. D. BACHE, Supt. U. S. Coast Survey, with a plate, - - - - - - - - - - - 197

XVIII. The Upper Silurian Beds of Western Tennessee: and Dr. F. Roemer's Monograph; by Prof. J. M. SAFFORD, - 205

XIX. Correspondence of JOACHIM BARRANDE, Sir WILLIAM E. LOGAN and JAMES HALL, on the Taconic System and the age of the Fossils found in the Rocks of Northern New England, and the Quebec Group of Rocks.—I. Introductory Remarks, 210

II. On the Primordial Fauna and the Taconic System of

Page.

Emmons, in a letter to Prof. Bronn of Heidelberg, 212.—III. Remarks on the Fauna of the Quebec Group of Rocks and the Primordial Zone of Canada. In a letter addressed to Mr. Joachim Barrande of Paris, by Sir William E. Logan, 216.—IV. Letter from James Hall, Palæontologist of New York, to the Editors of the American Journal of Science and Arts, 220.

XX. On a new Lead-Salt, Corresponding to Cobalt Yellow; by S. D. Hayes, - - - - - - - - - - 226

XXI. Sketch of the Geology of the Country about the Head-waters of the Missouri and Yellow Stone Rivers; by Dr. F. V. Hayden, with an Introductory letter by Capt. Raynolds, 229

XXII. Remarks on the Atomic Weights of the Elements; by Prof. Wolcott Gibbs, M.D., - - - - - - 246

XXIII. Abstract of a Meteorological Journal for the year 1860, kept at Marietta, Ohio; by Dr. S. P. Hildreth, - - 252

XXIV. On the Theory of Types in Chemistry; by T. Sterry Hunt, F.R.S., - - - - - - - - - - 256

XXV. Description of three new Meteorites.—Lincoln County Meteoric Stone: Oldham County (Ky.) Meteoric Iron: Robertson County (Tenn.) Meteoric Iron; by Prof. J. Lawrence Smith, - - - - - - - - - - 264

XXVI. Correspondence of Mr. Jerome Nicklès.—Obituary: Duméril, 266.—M. Payer, 267.—Pierre Daussy: Insalubrity of the air of Paris, 268.—Diffusion of Germs, (Panspermia,) Researches upon Spontaneous Generation, 269.—Chemical Synthesis, 270.—Acclimation, 272.—The Serimetre, 273.—Pseudomorphism and Pseudomophosis, 273.—The question of Inundations: Bibliography, 275.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a Compound of Boron with Ethyl, Frankland and Duppa, 276.—On the vapor-density of Chlorous Acid, Millon: New Researches on the Oxyd of Ethylene, Wurtz, 277.—Transformation of Olefiant Gas into complex Organic Acids, Wurtz, 278.—On the determination of Phosphoric Acid, Chancel, 279.—On the preparation of Oxygen, H. St. Clair Deville and Debray: On the Polyethylenic Alcohols, Lourenço, 280.—On Baudrimont's Protosulphid of Carbon, Playfair, 281.

Analytical Chemistry.—Contributions from the Laboratory of the Yale Scientific School; —communicated by Profs. Brush and Johnson.—Observations on Chancel's method of estimating phosphoric Acid, by Henry I. McCurdy, 281.

Technical Physics.—On the loss of Light by Glass Shades, in a letter to the Editors, by Mr. William King, 283,—Note by Mr. Storer, 284.

Technical Chemistry.—On the Alloys of Copper and Zinc, by Frank H. Storer, 286.

Geology.—On Prof. J. W. Dawson's papers on the Coal, 290.—Thirteenth Annual Report of the Regents of the University of the State of New York, 292.—Geological Surveys: Tennessee: Kentucky: Texas: Trilobites of the Wisconsin 'Potsdam,' F. H. Bradley, 294.—Chrome Garnet, T. S. Hunt, 295.

Zoology.—Contributions to the Natural History of the United States, by Louis Agassiz, Vol. III, 295.

Astronomy.—Translation of the Sûrya-Siddhânta, a Text-book of Hindu Astronomy, 298.

Miscellaneous Scientific Intelligence.—Interesting discoveries of Saurian and other fossil remains, in a letter from C. M. Wheatley: Upheaval of the sea and inundation at Kahului and Maliko, Maui, Sandwich Islands, 301.—Dr. Cooper's reply to Gov. Stevens's charge of Plagiarism in vol. XIX, 302: Fulgurites or Lightning tubes, by Dr. Hitchcock: New Meteorites from Hindostan, 302.—Results of a Scientific Mission to India and High Asia, by Hermann, Adolphe and Robert de Schlagintweit: The Botanical Society of Canada: Assinniboine and Saskatchewan Exploring Expedition: The American Association for the Advancement of Science, 303.

Obituary.—Major John LeConte; Charles W. Hackley, 303.

Book Notices.—Ritchie's Illustrated Catalogue of Philosophical Apparatus: Education; intellectual, moral, physical, by Herbert Spencer, 304.

Books received, 304.—*Brochures*—Agricultural Chemistry, 305.—Geology: Chemistry: Mineralogy, 306.—Zoology and Botany: Miscellaneous, 307.

Proceedings of Societies, 308–310.

NUMBER XCIII.

Page.

Art. XXVII. The Aurora, viewed as an Electric Discharge between the Magnetic Poles of the Earth, modified by the Earth's Magnetism; by Benjamin V. Marsh. With two plates, - - - - - - - - - - - - 311

XXVIII. Remarks upon the Atoll of Ebon, in Micronesia; by E. T. Doane, - - - - - - - - - - 318

XXIX. On Normal quasi-Vision of the Moving Blood-corpuscles, within the Retina of the Human Eye; by Levi Reuben, M.D., - - - - - - - - - - 325

XXX. Upon some Experiments connected with Dove's Theory of Lustre; by Prof. O. N. Rood, of Troy. - - - - 339

XXXI. The Quaternian or Diluvian Period, considered in its relation to the present Epoch; by F. J. Pictet, - - - 345

XXXII.—On the Presence of Phosphoric Acid in Igneous Rocks; by James Schiel, - - - - - - - - - 353

XXXIII. Ninth Supplement to Dana's Mineralogy; by Prof. Geo. J. Brush, - - - - - - - - - - 354

XXXIV. On the conversion of certain Conglomerates into Talcose and Micaceous Schists and Gneiss, by the Elongation, Flattening and Metamorphosis of the Pebbles and the Cement; by Prof. Edward Hitchcock, - - - - - 372

XXXV. On some points in American Geology; by T. Sterry Hunt, F.R.S., - - - - - - - - - - 392

SCIENTIFIC INTELLIGENCE.

Physics.—On Regelation, 414.—On the changes produced in the position of the fixed lines in the spectrum of hyponitric acid by changes in density, WEISS, 415.—Note on Dr. J. LeConte's Paper (on the influence of Musical Sounds on the flames of a jet of Coal Gas), with an experiment by Dr. Charles Sondhauss, and Note by Dr. Sharswood, 416.—Color of Blood Globules—Editorial Note to Dr. Reuben's paper: Subjective Optical Phenomena, 417.—On some illusions, and other phenomena, attendant on vision through colored media, by SIMON NEWCOMB, 418.

Chemistry.—Researches on the mutual relations of the Equivalents, by J. S. STAS, 419.—On the polyatomic bases of the nitrogen, phosphorus and arsenic series, A. W. HOFMANN, 420.—On the cyanid of Ethylene: On the separation of Mono- Bi- and Triethylamin 422.

Technical Chemistry.—On the Alloys of Copper and Zinc, by FRANK H. STORER, 423.—Preparation of Oxygen on a Great Scale, 427.—On the "Sweet Fermentation" of Milk, 428.—Products from the combustion of Gunpowder under different pressures, by B. F. CRAIG, 429.—On the Amounts of Lead contained in some Silver Coins, by ELIOT and STORER, 430.

Geology.—Botanical and Palæontological Report on the Geological State Survey of Arkansas; by LEO LESQUEREUX, 431.—Prof. Heer's reply to Dr. Newberry on the Age of the Nebraska Leaves, 435.—On the causes which gave rise to the generally elongated form and parallel arrangement of the pebbles in the Newport Conglomerate, by Prof. WILLIAM B. ROGERS, 440.

Mineralogy.—Note on Chloritoid from Canada, by T. STERRY HUNT, F.R.S., 442.

Botany.—Journal of the Proceedings of the Linnæan Society, 443.

Review.—Life on the Earth, its Origin and Succession, by Prof. JOHN PHILLIPS, M.A., LL.D., F.R.S., 444.—Species not Transmutable nor the Result of Secondary Causes, by C. R. BREE, Esq., M.D., F.L.S., &c., 449.

Book Notices.—The Manufacture of Vinegar: its Theory and Practice, with especial reference to the Quick Process, by CHARLES M. WETHERILL, Ph.D., M.D., 450.—Chambers' Encyclopædia: The American Cyclopedia: Second Report of a Geological Reconnoissance of the Middle and Southern Counties of Arkansas, made during the years 1859 and 1860, by D. D. OWEN, 455.

Miscellaneous Scientific Intelligence.—Catalogue of the Meteoric Collection of CHARLES UPHAM SHEPARD, 456.—Note and Correction to Mr. T. Sterry Hunt's paper on Types: Texas Survey: Kentucky Geological Reports, 460.

Obituary.—Ernest Haeusser: Prof. Hochstetter: Prof. J. G. C. Lehmann: G. H. von Schubert: Dr. J. F. Klotzsch: Louis de Vilmorin, 461.—J. B. Payer: John E. LeConte, 462.—Prof. J. W. Gibbs, 463.

New Comets: New Planet: Meeting of American Association for Adv. of Science, 463.

Index, 464.
